Purchasing AV Drop

AV Drop is the product of 4 years designing and installing structures for events. Over this period, our modular backdrop system has proven to be a solid, reliable and successful solution in many countries. While implementing it, we researched and improved our system, updating and refining AV Drop until converting it onto what it is today.

Now we start offering for sale our unique patented backdrop system for the first time.

Since it is a modular system, price varies depending on the dimensions of the structures you need to build.

A starting order package, comprising a basic platform cart and a flight case, allows you to build a vast array of structures, including a 9,6 meter-wide and 6 meter-high backdrop equipped with two screens, or a 24 meter-wide and 2,4 meter-high divider wall.

Two platform carts and flight cases can build a 19,2 meters wide x 6 meters high backdrop equipped with four frameless screens.

And so on. Completely modular. Endlessly customizable.

Reduced installation time

Save Effort

No tools Minimum labor force Only 6 different pieces

Save Materials

Fully reusable Just aluminum and fabrics Incredibly light

Fits everywhere and lifts

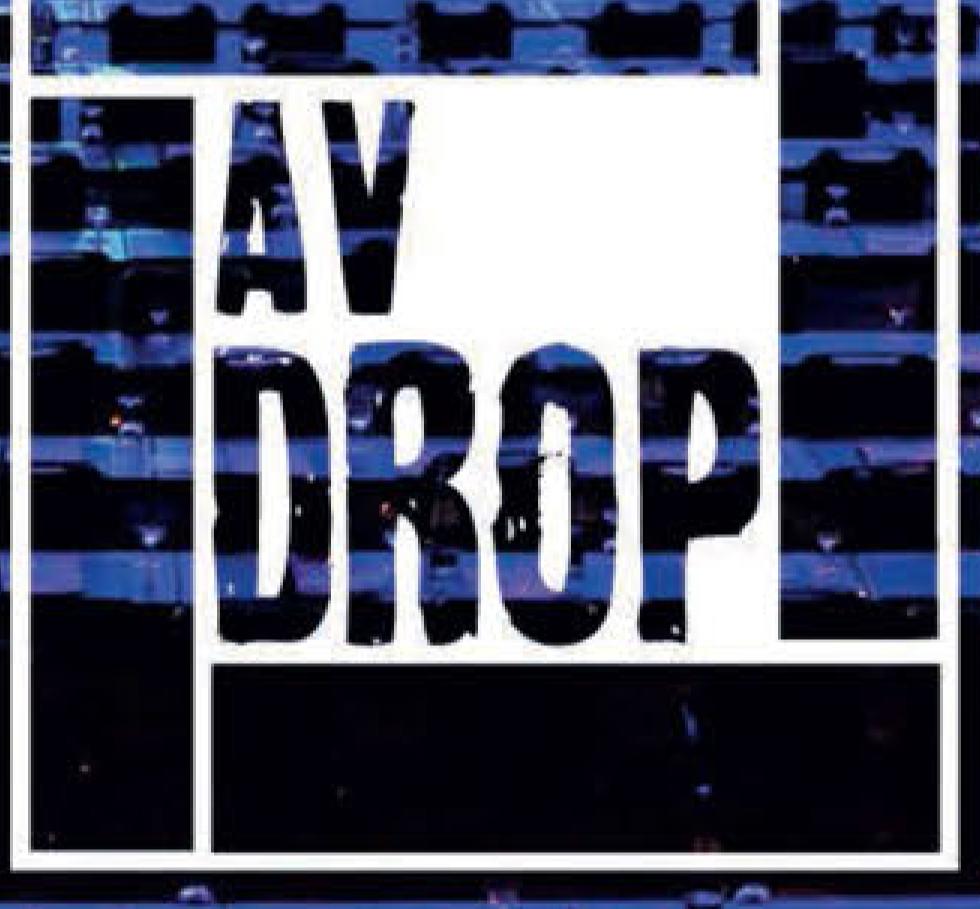

Save Space

Optimized for transports

Save Money

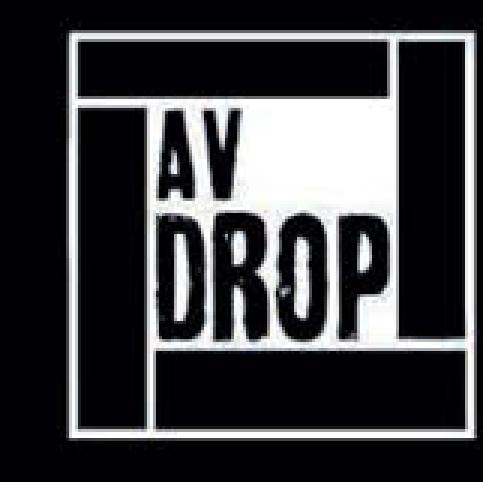

Modular and configurable Adapts to the size of each event

The modular structure that gives your AV company endless customization potential to fit every event

AV Drop adapts to the needs of every stage and event AV Drop is an innovative modular and configurable solution that allows you to create stage backdrops and many other event essentials like divider walls, projection screens or custom-made photo calls. In an event industry where scenography setups are still built by means of wood, hammers and nails, AV Drop emerges as an extremely solid and cost-effective alternative made of resilient aluminum and fabrics. AV Drop is a compact, fully reusable system, designed to be swiftly ader Way setup and dismounted by easily combining a very reduced number of pieces and parts. 1 backdrop 9,6 x 6 m. 1 backdrop 7,2 x 4,5 m. with 1 screen + masking frame for av control 3,5 x 1,2 m. with 2 screens 3 backdrops 3,6 x 3,5 m. 1 false wall double faced 15 x 2,4 m. 2 of them with 1 screen 4 photocalls 3,65 x 2,25 m 2 selfstanding screens 5,2 x 5 m. visual area 5 x 2,82 m.

How the AV Drop system works

CONFIGURING AV DROP

Choose dimensions

Simply select the pieces to adjust the backdrop to your event.

- Height: up to 6 meter
- Width: no limit

Choose fabrics design

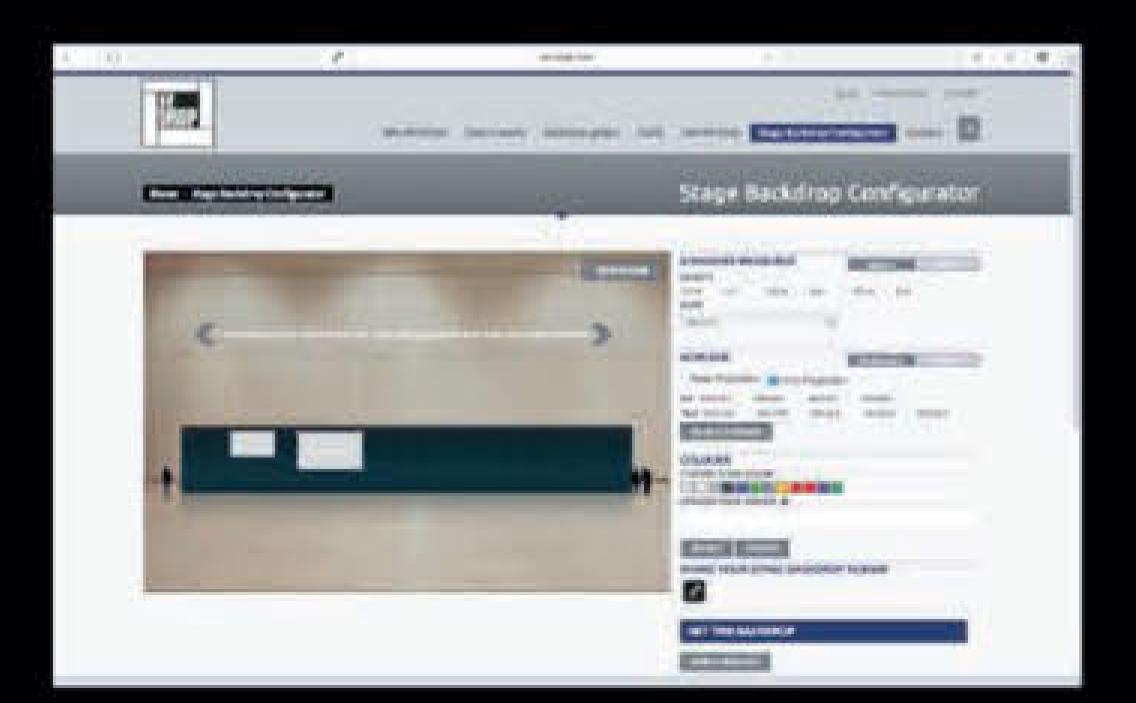

AV Drop system fabrics allow you to print any needed images, brand or texts on them.

Choose screens

Add screens to your backdrop, choosing amount, size, aspect ratio and front/rear projection.

STAGE BACKDROP ONLINE CONFIGURATOR

Besides our capacity to provide this system entirely tailor-made to fit any event's exact requirements, we offer our customers an online tool to help them configure their AV Drop set for each event. After selecting the dimensions of a backdrop and placing its screens, Stage Backdrop Configurator will list all the pieces needed to build it, as well as their overall weight.

Once you have configured your backdrop, you are ready to set it up ...

SETTING UP AV DROP

Get your stuff ready

Largest piece is 175 cm long. The system is optimized for platform carts, elevators and other transport.

AV Drop takes really little space in your warehouse or your transport ...

- Basic platform cart measures: 175 x 175 x 120 cm
- Flight case measures: 163 x 63 x 63 cm

Get your staff ready

It takes 3 or 4 technicians to quickly setup most configurations, clean and fast.

Get your structure ready

AV Drop uses positioners to snap frame pieces together, effortlessly, with a simple click; Velcro and clamps keep structures rock solid.

Installation can rapidly be completed as in these 3 examples:

1) Backdrop with screens (5 x 9,6 m)

- Manpower: 3 technicians
- Setup time: 3 hours

2) Divider wall without screens (2,4 x 34 m)

- Overall weight: 390 Kg (+ counterweights)
- Manpower: 3 technicians
- Setup time: 5 hours

3) Conference backdrop with screen (3 x 7 m)

- Overall weight: 137 Kg (+ counterweights)
- Manpower: 2 technicians
- Setup time: 1 hours

Along with the backdrop system, we supply manuals and video tutorials that explain how AV Drop works step by step. Setting it up is incredibly easy, but if you still have any doubts, we'll be glad to provide further support to your employees.
